

PROFILE OF ORDINARY SAND BLOCK NONARIAN DISTRICT LAHORE:

a. **Geological Survey, Location of the block and Assessment of the Mineral in the block:**

The block of ordinary sand is located on the upstream side of Motorway bridge mostly in agricultural land, however, some portion of it also falls in the bed of Ravi River. It falls on Survey of Pakistan Topo Sheet No.44-I/6. The deposits of sand in the block are in abundance and are replenished every year during the flood season and can be excavated with consent of concerned landowners.

b. **Quality of Mineral in the block:**

The quality of sand varies from fine grained sand to medium grained sand due to different densities of suspended particles in the water deposited during the floods. However overall quality of sand can be graded as medium.

c. **Availability of Access Roads to the block:**

The block is easily accessible from the bund road of Lahore, through T-Spur No.5, and an approach road is also available from Faiz Pur Khurd.

d. **Accessibility to the Market & Consumption of the Mineral in the block:**

The main consumption market for this block is Lahore city and the housing schemes located in the vicinity of Faiz Pur Interchange. The consumption market is easily accessible.

e. **Average excavated quantity of Mineral from the block during last 5 years:**

Average excavation during past 5 years cannot be assessed as no record in this regard is maintained in this office, however, as per observations during the inspections average excavation ranges from 60-80 trollies per day depending upon demand.

f. **Previous Bidding History of the block:**

Attached.

g. **Future Potential for Excavation from the block:**

As per information of this office, no new mega project of construction with more demand of sand than usual is going to take place in near future.

h. **Any Unique Factor at Site of the block Relevant for Determining Reserved Price:**
